

The right to the best flooring solution for each space from a single flooring system.

Most interior environments are designed to help people perform a variety of functions. Which is why we make flooring solutions for every environment, every need an end-user might have. And because our flooring solutions are part of a single comprehensive system, you can meet every functional requirement of a space without sacrificing aesthetics. That's the confidence of an integrated system.

Color Foundations: a guarantee of certain basic rights.

Color trends change, always keeping up with styles and opinions. But let's face it. You are managing a facility for the long term, not to chase the latest taste. That's why you want interior finishes that are in it for the long term as well, both in aesthetics and performance.

Johnsonite's Color Foundations™ System is a guarantee that all our product solutions will always be available in six core neutral palettes. Always. Need a linoleum pattern in a warm beige today? Well, ten years from now you will still find a warm beige in our Linoleum xF™ program. It's a simple, but important, commitment to you.

We believe that facility managers should have the right to make aesthetics a priority, without sacrificing ROI.

We believe that motivating environments, long-term performance and measurable financial return are not mutually exclusive. And so we created the Johnsonite High-Performance Flooring System supported by Color Foundations.

We hope you think of this as your Bill of Rights.

The right to a standards program that is actually a standard.

Your standards are chosen for the long haul. That's why they're called Standards. But discontinuations and product changes always have you scrambling, either compromising your aesthetics or impacting your bottom line.

With Color Foundations, we guarantee that we will always have colors available in every one of our product lines that fall within each of the six Color Foundations palettes.

Always. Forever. Guaranteed.

The right to expect a better bottom line.

When it's time to expand or refresh your facility, there will always be options within the system that work with your current design.

Save time and money searching for replacements or trying to match existing colors.

Why the system is the solution.

“This facility has offered us the opportunity to compete with our sister high school. We are no longer the ugly stepsister; we are now the front runners of the best facility in the city.”

Kim Redmond
Principal, Timken High School
Canton, Ohio

CG

COOL GREY

Always a good neutral choice, cool grey is a balanced, conservative palette that evokes sophistication, just on the lighter side of black.

To see our full offering of products in cool grey, visit johnsonite.com.

BLACK

A naturally strong color range, black's basic beauty is that it works well with most colors, increasing their apparent saturation or brightness.

To see our full offering of products in black, visit johnsonite.com.

Color Foundations.™

Part of a system that balances aesthetics, long-term availability, performance and, most importantly, measurable financial return.

That's why the integrated Johnsonite system with Color Foundations is so valuable in a segment like healthcare – optimizing performance without compromising aesthetics.

“First impressions are important for any business, even a hospital. We want patients to see a clean, safe, efficient space that’s also beautiful. The Johnsonite flooring has upgraded our image while giving us great performance in terms of maintenance, safety and comfort.”

Richard C. Rose
Director, Facility Management Systems
Canonsburg General Hospital, Canonsburg, PA
